About me

Junior Full Stack Developer with a focus on front-end and training in graphic design. Specialized in Angular and .NET, applying SOLID principles, Clean Code, and clean architecture.

Tech Experience

Full Stack Developer

Nunsys

October 2024 - December 2024

- Participation in company **internships** complemented by an intensive Full Stack development **bootcamp**.
- Development and maintenance of web applications using **Angular**, **.NET**, and **Java**.
- Application of **Clean Architecture**, **SOLID** principles, Domain-Driven Design (**DDD**), and design patterns to improve software quality and scalability.
- Version control management using **Git** with **Azure DevOps**, following the GitFlow methodology for efficient and collaborative control.
- Containerization of applications with **Docker** to facilitate deployments and reproducible environments.
- Active collaboration in an **agile** team with weekly sprint cycles, promoting communication and continuous delivery.
